

Keep it healthy for maximum implant performance

Component® with Tylan® keeps every implant site healthier.

The blue Tylan pellet in every dose of Component with Tylan provides localized antibacterial protection at the implant site, minimizing the inflammatory response and encapsulation that occurs around every implant. As a result, the active ingredients in Component with Tylan can consistently deliver their full performance benefits in calves, stockers and feedlot cattle. Performance studies* demonstrate that Component with Tylan delivers an extra \$7 to \$8 per head profit to your bottom line.

To learn more about the economic benefits of Component with Tylan, call 888-462-3493 or visit www.vetlife.com.
