

A Healthy Immune System Starts with Good Nutrition.

A cow's natural immune system needs to be healthy to fight the stresses of:

- Production and reproduction
- Molds and mycotoxins in feed
- Pathogens in the environment

Maintaining a healthy immune system can:

- Reduce somatic cell count
- Reduce incidences of mastitis
- Reduce incidences of metritis
- Reduce death loss and culls

Make sure your herd's nutrition is optimal by feeding two ounces per cow per day of OmniGen-AF nutritional supplement.
