

70th Minnesota Nutrition Conference
and
University of Minnesota Research Update, *and*
Pre-conference Symposium: Fostering Optimum GI Development,
Integrity and Function in Livestock and Poultry
September 15-16, 2009

Table of Contents

<i>Title/Speaker</i>	<i>Page</i>
Pre-conference Symposium	
Essential oils as rumen modifiers in dairy cows: Opportunities and challenges21 - <i>Chaouki Benchaar, Agriculture and Agri-Food Canada</i>	
Modulation of immune function in food producing animals designed to optimize gut health, general well-being and production performance- With special emphasis on yeast cell wall components.....44 - <i>Jan Van Eys, Nutri-Ad</i>	
Epigenetic adaptations in poultry: A case for in ovo feeding strategies60 - <i>Peter Ferket, North Carolina State University</i>	
Organic acid utilization in early phases of pig production, with special emphasis on butyric acid: Enzymatic efficiency, antimicrobial potential and gastro intestinal development77 - <i>José Antonio Cuarón, INIFAP</i>	
University of Minnesota Livestock Research Update	
Crude glycerin in market turkey diets88 - <i>Sally Noll, Department of Animal Science</i>	
Growth performance, carcass characteristics, physiological and gut health effects of feeding diets containing BMD to heat stressed finishing pigs89 - <i>Jerry Shurson, Department of Animal Science</i>	
Reducing negative effects of sulfur in beef cattle diets90 - <i>Grant Crawford, University of Minnesota Extension</i>	
Trace mineral nutrition of dry dairy cows and progeny growth91 - <i>Greg Golombeski, Department of Animal Science</i>	
Low oligosaccharide soybean meal in diets of early weaned pigs92 - <i>Samuel Kofi Baidoo, Southern Research and Outreach Center</i>	
Managing hay and supplement intake in wintering beef cows93 - <i>Alfredo DiCostanzo, Department of Animal Science</i>	
Biofilters for odor control94 - <i>Kevin Janni, Department of Bioproducts and Biosystems Engineering</i>	
In vitro and in vivo effects of soluble crude protein, <i>Yucca schidigera</i> extract and <i>Saccharomyces cerevisiae</i> on rumen metabolism95 - <i>Martin Ruiz-Moreno, Department of Animal Science</i>	

Table of Contents *continued*

<i>Title/Speaker</i>	<i>Page</i>
Animal Welfare for Nutritionists	
Distinguishing between animal abuse and bad management96 - <i>Edmond Pajor, University of Calgary (paper not available at press time)</i>	
Expectations of an animal welfare audit97 - <i>Earl Dotson, Validus Services LLC</i>	
Ruminant Session	
Poisonous plants in livestock feeding 106 - <i>Krishona Martinson, University of Minnesota</i>	
Nutrition and management of feedlot heifers 115 - <i>Jolene Kelzer, University of Minnesota</i>	
Effects of source and particle size of fiber on feedlot performance and carcass characteristics 134 - <i>Nicolas DiLorenzo, Texas Tech University</i>	
Implications of cow size on formulating beef cow rations 147 - <i>Ryon Walker, University of Minnesota Extension</i>	
Nutritional factors affecting mammary gland development of growing dairy heifers 158 - <i>Michael VandeHaar, Michigan State University</i>	
Milk fat depression: Interactions of ionophores, fat supplements, and other risk factors 172 - <i>Thomas Jenkins, Clemson University</i>	
Achieving better reproduction: Does nutrition impact reproduction programs? 185 - <i>Ricardo Chebel, University of Minnesota</i>	
New on-farm technologies for dairy consultants 205 - <i>Jeff Reneau, University of Minnesota</i>	
Non-ruminant Session	
Dietary interventions to enhance human health aspects of pork 210 - <i>Ryan Cox, University of Minnesota</i>	
National swine nutrition guide 220 - <i>Mark Whitney, University of Minnesota Extension</i>	
New amino acid concentrations for industry grow-finish swine diets 223 - <i>Mark Bertram, First Choice Livestock, LLC</i>	
Feeding market boars for pork production 234 - <i>José Antonio Cuarón, INIFAP</i>	
Proper conduct and interpretation of field trials 248 - <i>Kenneth Krueger, Diamond K Research and Consulting Service</i>	
Digestible amino acid formulations for poultry - <i>Todd Applegate, Purdue University</i> 255	
Feed formulations to control risk 266 - <i>Bill Roush, USDA-ARS (retired)</i>	

69th Minnesota Nutrition Conference
and
University of Minnesota Research Update, *and*
Symposium: Role of Immune Tissue in Fighting Pathogen Invasion
September 16-17, 2008

Table of Contents

<i>Title/Speaker</i>	<i>Page</i>
Effect of Bambermycins and Level of Distillers Grains with Solubles on Performance and Carcass Characteristics of Feedlot Cattle – <i>Grant Crawford, University of Minnesota Extension</i>	27
Use of Enzymes in Swine Diets – <i>Sam Baidoo, Southern Research and Outreach Center, University of Minnesota</i>	28
Impact of Glycerol in Milk Replacer on Dairy Calf Performance – <i>Mary Raeth-Knight, Department of Animal Science, University of Minnesota</i>	29
Feeding Crude Glycerol to Lactating Sows – <i>Lee Johnston, West Central Research and Outreach Center, University of Minnesota</i>	30
Utilization of Glycerin as a Source of Energy in Turkey Diets – <i>Sally Noll, Department of Animal Science, University of Minnesota</i>	31
Variation in Calf Growth at the Southern Research and Outreach Center – <i>Hugh Chester-Jones, Southern Research and Outreach Center, University of Minnesota</i>	32
Organic Dairy Production at the University of Minnesota – <i>Dennis Johnson, West Central Research and Outreach Center, University of Minnesota</i>	33
Update on the National Air Emissions Monitoring Study (NAEMS) – <i>Larry Jacobson, Bioproducts and Biosystems Engineering, University of Minnesota</i>	34
Fatty Acids, Toll-Like Receptors and the Regulations of Growth and Efficiency in Meat Animals – <i>Mike Spurlock, Department of Human Nutrition and Animal Science, Iowa State University</i>	35
Health of Non-Ruminant Neonates: Management and Gut Microbiota – <i>Charles Maxwell, Department of Animal Science, University of Arkansas</i>	47
Immune Development of the Ruminant Neonate – <i>Amelia Woolums, Department of Large Animal Medicine, University of Georgia</i>	71
Modulation of Immune Function in Ruminant Livestock – <i>Neil Forsberg, Department of Animal Science, Oregon State University</i>	78
Nutrient Requirements of Small Ruminants: An Overview – <i>Doug Pamp, Biovance Technologies</i>	86

Table of Contents *continued*

<i>Title/Speaker</i>	<i>Page</i>
Finding Lost Feed Dollars by Reducing Variation in Rations – <i>Bill Stone, Diamond V</i>	92
Moderate Energy Dry Cow Diets May Improve Postpartum Health – <i>Noah Litherland, Department of Animal Science, University of Minnesota</i>	104
Grass vs Legume Forages for Dairy Cattle – <i>Jim Paulson, University of Minnesota Extension</i>	119
Vitamins and Minerals to Improve Marbling – <i>Connie Larson, Zinpro Corporation</i>	134
Mixing Integrity for Ruminant Diets Containing By-Products – <i>Sheri Bierman, Corn Belt Livestock Services</i>	145
Financial Returns to Grain Processing in Feedlot Diets With or Without Distillers Grains – <i>Grant Crawford, University of Minnesota Extension</i>	160
Feedlot Facilities and Management: Design, Retrofitting, and Maintenance..... – <i>Alfredo DiCostanzo, Department of Animal Science, University of Minnesota</i>	178
Maximizing Synthetic Amino Acids in Swine Diets – <i>Brent Ratliff, JBS United</i>	187
Antioxidants in Swine Diet – <i>Joe Hahn, Kemin Industries</i>	201
Nutritional Effects on Fetal Imprinting in Swine – <i>Lee Johnston, West Central Research and Outreach Center, University of Minnesota</i>	207
Systems Approach to Nutrient Measures with NIR – <i>Brian Knudson, Cargill Animal Nutrition, Cargill, Inc.</i>	223
Enteritis and Oxidative Stress are Associated with Loss of Intestinal Barrier Function – <i>Julia Dibner, Novus International</i>	231
The Ideal Amino Acid Profile for Laying Hens – <i>Stacey Roberts, Departments of Animal Science and Agricultural and Biosystems Engineering, Iowa State University</i>	244
Robust Estimation of Dietary Phosphorus Needs of Commercial Laying Hens and Turkeys – <i>Kevin Roberson, Michael Foods Egg Products Co.</i>	252

68th Minnesota Nutrition Conference
and
University of Minnesota Research Update:
Modern Concepts in Livestock Production for 2007
September 18-19, 2007

Table of Contents

Speaker	Presentation Title	Page
Brian Buhr	Economics of corn demand and feed prices	1
Jerry Shurson	DDGS and pork fat quality	2
Nicolas DiLorenzo	Avian-derived antibodies in disease prevention	3
Dennis Johnson	Group feeding dairy calves.....	4
Jacqueline Jacob	Feeding organic poultry.....	5
Chuck Clanton	Odor control from livestock facilities.....	6
Jun Zhu	Bio-gas generation from livestock wastes	7
Sam Baidoo	Impact of gestation housing on sow performance	8
Bill Weiss	Energetics for the practicing nutritionist	9
Ruurd Zijlstra	Practical aspects of implementing an NE system for swine	19
Craig Coon	Maximizing energy utilization for poultry	27
Ken McGuffey	Energy sparing effects of ionophores in ruminant diets with implications to other nutrients	51
Charles Stark	Feed processing to optimize animal performance	66
Grant Crawford	Managing sulfur concentrations in feed and water.....	80
Shawn Archibeque	Endocrine disruptor residue in feedlot and dairy waste streams	94
Alfredo DiCostanzo	Feeding to meet protein fractions and amino acid needs in feedlot cattle	109
Charles Schwab	Metabolizable protein and amino acid nutrition of the dairy cow: Where are we in 2007?	121
Mike Orth	Optimizing skeletal health: The impact of nutrition.....	139
Robert Renema	Impact of fat source and vitamin E on egg production and egg quality	144
Paul Tillman	Analysis, purchasing, and utilization of animal by-products	145
L. Lee Southern	Maximizing crystalline amino acid use in diets for swine and poultry.....	162
Trevor DeVries	Maximizing the potential of dairy rations through feed bunk management and design.....	174
Pat Hoffman	Nutritional strategies for dairy heifers to achieve target growth rates	186
Norman St. Pierre	Economics of replacing corn with other energy sources in ruminant diets.....	193
Jamie Matthews	Nutritional genomics: A new frontier of livestock nutrition?.....	206
Eric Berg	Understanding carcass fat quality: What nutritionists need to know.....	214
Brian Kerr	Nutritional value of glycerol for non-ruminants.....	220

*Papers appear in the order of presentation at the 68th Minnesota Nutrition Conference and University of Minnesota Research Update held September 18-19, 2007.

67th Minnesota Nutrition Conference

and

University of Minnesota Research Update:
Livestock Production in the New Millennium

September 19-20, 2006

Table of Contents

Speaker	Presentation Title	Page
Pedro Urriola	Prediction of amino acid digestibility in distillers dried grains with solubles by color, acid insoluble crude protein, soluble protein and fluorescence	1
Sally Noll	Feed form and beak trimming methods: Effects on market turkey performance	2
Marcia Endres	Compost barns for dairy: Latest findings	3
Marshall Stern	Studies using continuous culture fermenters and a three-step in situ/in vitro procedure to estimate protein metabolism in ruminants	4
Satish Gupta	Antibiotic feeding in food animals and its consequences on the environment	5
Bob Koehler	Maximizing value of manure: An on-farm study	6
Jamie Larson	Effect of organic or inorganic trace mineral supplementation on follicular response, ovulation, and embryo production in superovulated angus heifers	7
Hugh Chester-Jones	Dairy heifer calf performance to two months of age at the University of Minnesota Southern Research and Outreach Center (SROC) 2004-2006	8
Jim Riddle	Requirements for organic livestock in the United States	9
Richard Kersbergen	Profitability of northeast organic dairy farms	14
Jon Anderson	The role of certification agencies in the organic marketplace	21
Ed Klinewort	Feed milling challenges for organic production	27
Bea James	Consumers drive demand of organics	33
Greg Lardy	Protein supplementation of grazing livestock	37
Francisco Diez-Gonzalez	Improving the safety of beef – Pre-harvest feeding and management	54
Alex Bach	Protein, amino acid, and peptide requirements for proper rumen function and milk production	67
Lance Baumgard	Environmental influence on metabolism of ruminants	80
Rob Pritchard	Update on corn distillers co-products in ruminant diets	90
Lance Baumgard	Dietary manipulation of the nutritional value of milk	95
Karen Beauchemin	Effective fiber for dairy diets	107
Hank Classen	Theory and practice of dietary enzymes use in corn-soybean meal diets for poultry	120

Table of Contents *continued*

Speaker	Presentation Title	Page
Guy Miller	Nutritional approaches to disease control (<i>paper not available at press time</i>)	128
Mingan Choct	Influence of gut health on nutrition.....	129
Nicholas Gabler	How much does immune status influence nutrient requirements? – The nutritional regulation of cytokines	139
Sally Noll	What’s new since September 2005 in feeding distillers co-products to poultry	149
Jerry Shurson	What’s new in feeding distiller’s by-products to swine.....	155
Karen Dorrell	Best practices for integrating feed formulation, purchasing, and production to ensure quality and compliance.....	167
Lee Johnston	Improving pig welfare – The role of dietary fiber	171

*Papers appear in the order of presentation at the 67th Minnesota Nutrition Conference and Research Update Session held on September 19-20, 2006.

66th Minnesota Nutrition Conference
and
Technical Symposium: Future of Corn in Animal Feed
September 20-21, 2005

Table of Contents

Speaker	Presentation Title	Page
John Beghin	A global picture of corn supplies, animal feed use, and non-feed uses (<i>paper not available at press time</i>).....	1
Fred Owens	Corn genetics and animal feeding value.....	2
Kim Koch	Corn: Relationship of growing, harvesting, and storage on feeding (nutritive) value	26
Hans Stein	Methods to determine amino acid digestibility in corn by-products	35
Jerry Shurson	Corn by-product diversity and feeding value to non-ruminants	50
Galen Erickson	Feeding of wet corn milling byproducts to beef cattle	69
Doug Tiffany	Expanding renewable fuel production and effects on animal feed markets (<i>paper not available at press time</i>)	80
Martin Verstegen	Diet composition and non-antibiotic feeding programs in Europe.....	81
Todd Applegate	Feeding to reduce emissions in manure from non-ruminants.....	95
Richard Kohn	Feeding cattle to reduce nitrogen emissions.....	105
Fred Owens	Corn grain processing and digestion	113
John Patience	The merits, benefits and challenges of adopting the net energy system for swine in a North American context.....	134
Robert Harrell	Neonatal swine intake, growth, and development	151
Martin Verstegen	Parity and phase feeding of sows	161
Robert Teeter	An accounting of broiler energy expenditures.....	172
Kenny Webb	Peptide absorption and utilization: Molecular to whole animal aspects.....	190
Sheila Scheideler	Calcium particle size, calcium level and phosphorus levels in laying hens.....	207
Dirk Hoehler	Using NIR spectroscopy for prediction of amino acids in feed ingredients	222
Alvaro Garcia	Preservation and feeding of wet distillers grains to dairy cattle	234
Hugh Chester Jones	Effect of nutrition and management of dairy heifers on resultant cow longevity (<i>paper not available at press time</i>)	244
Cliff Lamb	The nutritional needs of a first calf beef heifer.....	245
Brian Crooker	Reproductive success in dairy cows: The linkage of milk yield, nutrition, and reproduction	255
Ken Odde	Effects of maternal nutrition on subsequent beef calf health and performance	270
Paul Kononoff	Effective fiber estimates and ration balancing for dairy cattle	277
Tom Peters	Quality control processes of feeding cattle and critical control points in the feedlot	285

*Papers appear in the order of presentation at the 66th Minnesota Nutrition Conference and Technical Symposium held September 20-21, 2005.

65th Minnesota Nutrition Conference
and
Pre-Conference Symposium:
On the Cutting Edge of Direct Fed Microbials
September 21-22, 2004

Table of Contents

Speaker	Presentation Title	Page
Larry Martin	The competitiveness impacts of Canada's agricultural product review regulations	1
Scott Radcliffe	Antibiotic alternatives for non-ruminants – Focusing on DFM's	9
Dwain Bunting	Evaluating feed additives for the transition cow – Biology, marketing, and risk management	18
Kelly Lechtenberg	Feedlot interventions for food safety (<i>paper not available at press time</i>)	27
Kurt Fenster	DFM developments – What the future can hold	28
Jim Linn	Feed efficiency of lactating dairy cows	38
Pete Anderson	Marginal economic returns to feeding and management of feedlot cattle	47
Brian Richert	Economic modeling of returns to swine feeding programs.....	64
Rob Gous	Economic consequences of changes in poultry feeding programs.....	81
Norman St. Pierre	Statistics for commercial field trials	95
Hans-Joachim Jung	Forage fiber digestibility: Measurement, variability, and impact	105
Jeff Firman	Amino acid digestibility and use of animal by-products in turkey diets.....	126
Everett Thomas	Alfalfa vs. alfalfa-grass mixtures in diets for dairy cows	135
Jeff Knott	Nutritional value of yeast by-products from ethanol production for young pigs	142
John Doerr	Yeast contamination of corn silage and grain	160
Craig Wyatt	Current advances in feed enzymes for corn-soya based poultry and swine diets (<i>paper not available at press time</i>).....	171
Alfredo DiCostanzo	Modification of rumen bacterial populations for enhanced performance and health.....	172
Kevin Roberson	Ca:P ratios in phytase-containing poultry diets	186
Brian Sloan	Amino acid nutrition of the dairy herd.....	192
Scott Fahrenkrug	Interface between molecular genetics and swine nutrition	203
Michael T. VanKoeveering	The effect of Optaflexx© on growth performance and carcass traits of steers	220
Allen Pettey	Phosphorus balance in practical swine diets: Assessing P requirements for growing and finishing swine using factorial techniques	227
Stephen Emanuele	Sugar in diets for dairy cows.....	241
Lee Southern	Isoleucine requirement of late finishing barrows.....	255

*Papers appear in the order of presentation at the 65th Minnesota Nutrition Conference and Pre-Conference Symposium held September 21-22, 2004.

64th Minnesota Nutrition Conference
and
Pre-Conference Symposium: The World of Corn
September 16-17, 2003

Table of Contents*

Speaker	Presentation Title	Page
Marj Faust	Global GMO issues and challenges.....	1
Gary Munkvold	Mold and mycotoxin review.....	9
Dan Jones	Assessing corn energy for monogastrics	16
Don Sapienze	Analytical approaches to the nutritional value of corn.....	22
J. Ernest Minton	The gut as an immune tissue: New jobs for the gut epithelium?.....	34
Jim Pettigrew	Effect of diet on intestinal bacterial populations in swine.....	48
T. G. Nagaraja	Response of the Gut and microbial populations to feedstuffs: The ruminant story	64
Alan Mathew	Development of antibiotic resistance in livestock production.....	78
Trevor Ames	Immune dysfunction in dairy herds	93
John Arthington	Trace Mineral nutrition and the immune response in cattle	106
Arlyn Jud Heinrichs	Nutrition to optimize calf health and performance.....	117
Chris Reynolds	Glucose balance in the dairy cow.....	123
Larry Berger	Lifetime Impacts of management on beef carcass quality and profitability	135
Deb Roeber	Nutrition and Management manipulations to enhance consumer appeal and safety of beef.....	153
Marcia Endres	Dairy cow handling... Does it affect the bottom line?.....	162
Brian Kerr	Update on amino acid nutrition of swine and poultry	172
Elizabeth Koutsos	Nutritional cost of immune activation in poultry	199
John Rooke	Use of Omega-3 fatty acids in sow diets	207
John Doerr	Troubleshooting mycotoxin problems.....	221
Hans Stein	Digestible amino acids: Determination and use	231
Theo van Kempen	In vitro digestibility: Methods and their value	258

*Papers appear in the order of presentation at the 64th Minnesota Nutrition Conference and Pre-Conference Symposium held September 16-17, 2003.
